Voices of N/Pre

Tanabata Party

We celebrated Tanabata this month by decorating the classroom in lovely, handmade decorations and by dressing up in our finest summer outfits. Everyone wore jinbeis, yukatas, and happis printed with amazing patterns to make the day even more fun.

Playing with Water

This month has been so hot. So as a way to cool off and have fun, the N/Pre students played in the Water Fountains in Park City. They all had an amazing time and were soaked to the bone by the time the fountain turned off. It is something they will definitely want to do again.

Bug Catching

In Japan, summer brings many things and one of those things are insects. The N/Pre classes learned all about the different bugs and insects that can be found crawling, buzzing, or flying around in the hotter months. Kids at this age love bugs so they loved this lesson a ton.

Book Recommendation

Jabari Jumps

A story of a boy who went to the pool on a hot day and faced his fears of jumping off the tall diving board.

Youkai no Natsumatsuri

A tanuki and his friends spend time at a festival but the mask he bought is more than just a mask.

Baby&Mommy

Summer Foods

The Baby and Mommy class had lessons all about summer food. Using all the skills they have learned so far, they were able to make shaved ice out of crepe paper. They played with ice cubes and had a great time all around. They have come so far in such a short amount of time.

Kinder Memories

Festival Market

After weeks of hard work, the Kinder class were finally ready to put on their Tanabata Festival Market. Splitting up into their teams again, they decorated their tables to make them stand out from the others. They eagerly waited for the N/Pre students to come and once they did, they worked hard to sell the things they had made. By the end of the event, the tables were empty and everyone was happy.

Learning about Lemons

We had an extra special inquiry this month from our very own Principal, Shuka-sensei. She brought in some branches from the lemon tree that grows in her garden. On the branches were some baby lemons and a bird's nest. The class were fascinated by what they were seeing and listened to everything Shuka-sensei had to say. They finished up by drawing their own lemon trees and baby lemons.

IB Thinking

Our City

The Kinders have been learning all about their local community, as a part of the IB theme of How We Organise Ourselves. We have been learning a lot about the people and places that they can see around them in Kashiwanoha. They know exactly where everything is. With the knowledge they've gained, they made their own city out of paper. They made sure to have important places like shops, hospitals, and stores.

flowerbed Project

The Kinders, after a lot of time of planning and preparation, finally planted some flowers in the flowerbeds here in Kashiwanoha. We have been working on this project for months, to make sure that the right flowers were chosen, a schedule for watering was made, and all the equipment was purchased. We now have two lovely flowerbeds full of blue and yellow flowers. The students have been diligent in their watering and tending.

Ballet Experience

The Kinders had an extra special lesson this month. Teachers from the local ballet school came to give them a taste of ballet dancing.

They learned some of the basic stretches, poses, and moves, to show them how fun ballet can be. Some of the students were a little shy at the start but soon, they were dancing with the rest of their class. We do lessons like this to try and introduce our students to activities or areas that they might not get a chance to normally and give them new experiences.
